

The 55<sup>th</sup> Meeting of the APEC Expert  
Group on Energy Efficiency &  
Conservation (EGEEC 55)  
17-20 Nov. 2020

# Economy Update in Chinese Taipei

# Energy Efficiency Management

# The Policy Tools of Energy Efficiency Management

---

## Mandatory Programs

- Minimum Energy Performance Standard (MEPS)
- Energy Efficiency Ranking Labeling
- Energy Management and Audit

## Voluntary Programs

- Energy Conservation Labeling (ECL)
- Public Awareness, Education & Promotion
- ESCO

# Equipment EE Management

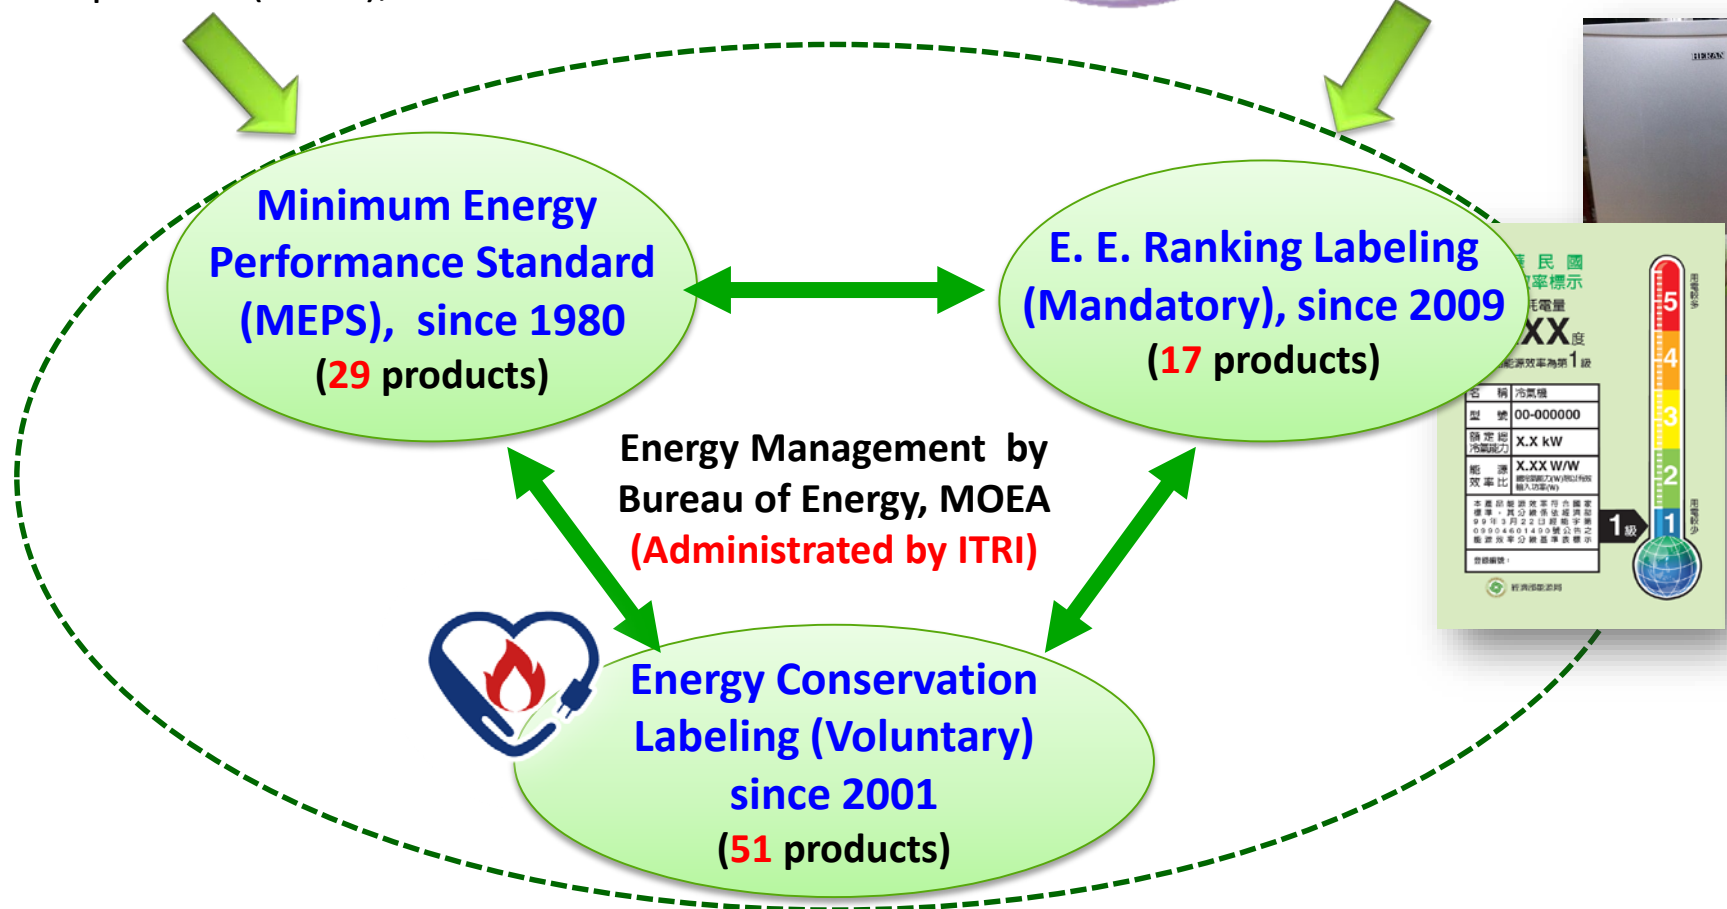

**CNS**

Bureau of Standards, Metrology & Inspection (BSMI), MOEA

**Accreditation Foundation**  
Testing Lab Accreditation

# Details of EE Management Programs

EE programs	MEPS	EE Ranking Labeling	Energy Conservation labeling
<b>Category</b>	Mandatory (since 1980)	Mandatory (since 2009)	Voluntary (since 2001)
<b>Main Purpose and Function</b>	Ban on import or sale of low energy efficiency products	Enforce manufactures to provide information of product energy efficiency	Encourage and promote high EE products
<b>Execution in Progress</b>	Set by BOE <sup>1</sup> and enforced by BSMI <sup>2</sup> , follow the law of “The Commodity Inspection Act”.	Promulgated by BOE. Manufacturers are required to register regulated products with BOE.	The standards are higher than national standards and MEPS by 10-50%
<b>Revision Guidelines</b>	Phase out the lowest energy efficiency products (15-30% of the total products)	Revise the ranking levels according to the new MEPS.	Revise the top 20-30% of the product standards

The labels will be adjusted every 3-5 years, based on the new MEPS and product market share

<sup>1</sup> Bureau of Energy

<sup>2</sup> Bureau of Standards, Metrology, and Inspection

# Mandatory EE Management Programs

Policy	MEPS		EE Ranking Labeling
Date	Implemented on December, 1980		Implementation on July, 2009
Purpose	Remove the low efficiency products from market		Provide product information to consumers for purchasing efficient products
Item	<b>29 product categories</b>		<b>17 product categories</b>
Product	<ol style="list-style-type: none"> <li>1. Air Conditioners (change EER to CSPF in 2016)</li> <li>2. Refrigerators(2018)</li> <li>3. Dehumidifiers(2018)</li> <li>4. Fluorescence Lamps</li> <li>5. Ballast for Fluorescent Lamps</li> <li>6. Compact florescent lamps</li> <li>7. Fluorescent Lamps with embedded ballasts</li> <li>8. Incandescent bulbs</li> <li>9. Electric Hot Water Pots</li> <li>10. Electric Storage Tank Water Heaters</li> <li>11. Instantaneous Gas Water Heaters</li> <li>12. Gas Stoves</li> <li>13. Vehicles</li> <li>14. Motorcycles</li> <li>15. Fishing vessel engines</li> <li>16. Low-voltage single-phase induction motors</li> </ol>	<ol style="list-style-type: none"> <li>17. Low-voltage three-phase squirrel-cage induction motors</li> <li>18. LED Lamps</li> <li>19. Water chilling air-condition systems</li> <li>20. Boilers</li> <li>21. Warm-Hot Drinking Water Dispensers</li> <li>22. Chilled-Warm-Hot Drinking Water Dispensers</li> <li>23. Warm-Hot Drinking Water Fountain</li> <li>24. Chilled-Warm-Hot Drinking Water Fountain</li> <li>25. Water dispenser supplied by packaged drinking water</li> <li>26. Rice Cooker</li> <li>27. Air Compressor(2021.01.01)</li> <li>28. Electric storage drink water heaters(2021.01.01)</li> <li>29. Double-capped LED lamps (2022.01.01)</li> </ol>	<ol style="list-style-type: none"> <li>1. Air Conditioners (2016.01.01RV)</li> <li>2. Refrigerator/Freezer (2018.01.01RV)</li> <li>3. Automobiles (2010.7.1)</li> <li>4. Motorcycles (2010.7.1)</li> <li>5. Dehumidifiers (2018.01.01RV)</li> <li>6. Self-ballasted fluorescent lamps (2011.7.1)</li> <li>7. Instantaneous Gas Water Heaters (2012.12.6)</li> <li>8. Gas Stoves(2012.12.06)</li> <li>9. Electric hot water pots (2015.01.01)</li> <li>10. Electric Storage Tank Water Heaters (2015.10.01)</li> <li>11. Warm-Hot Drinking Water Dispensers (2016.12.01)</li> <li>12. Chilled-Warm-Hot Drinking Water Dispensers (2016.12.01)</li> <li>13. Warm-Hot Drinking Water Fountain (2018.01.01)</li> <li>14. Chilled-Warm-Hot Drinking Water Fountain (2018.01.01)</li> <li>15. Rice Cooker(2020.01.01)</li> <li>16. Water chilling packages using the vapor compression cycle (2020.07.01)</li> <li>17. Air Compressor (2021.01.01)</li> </ol>

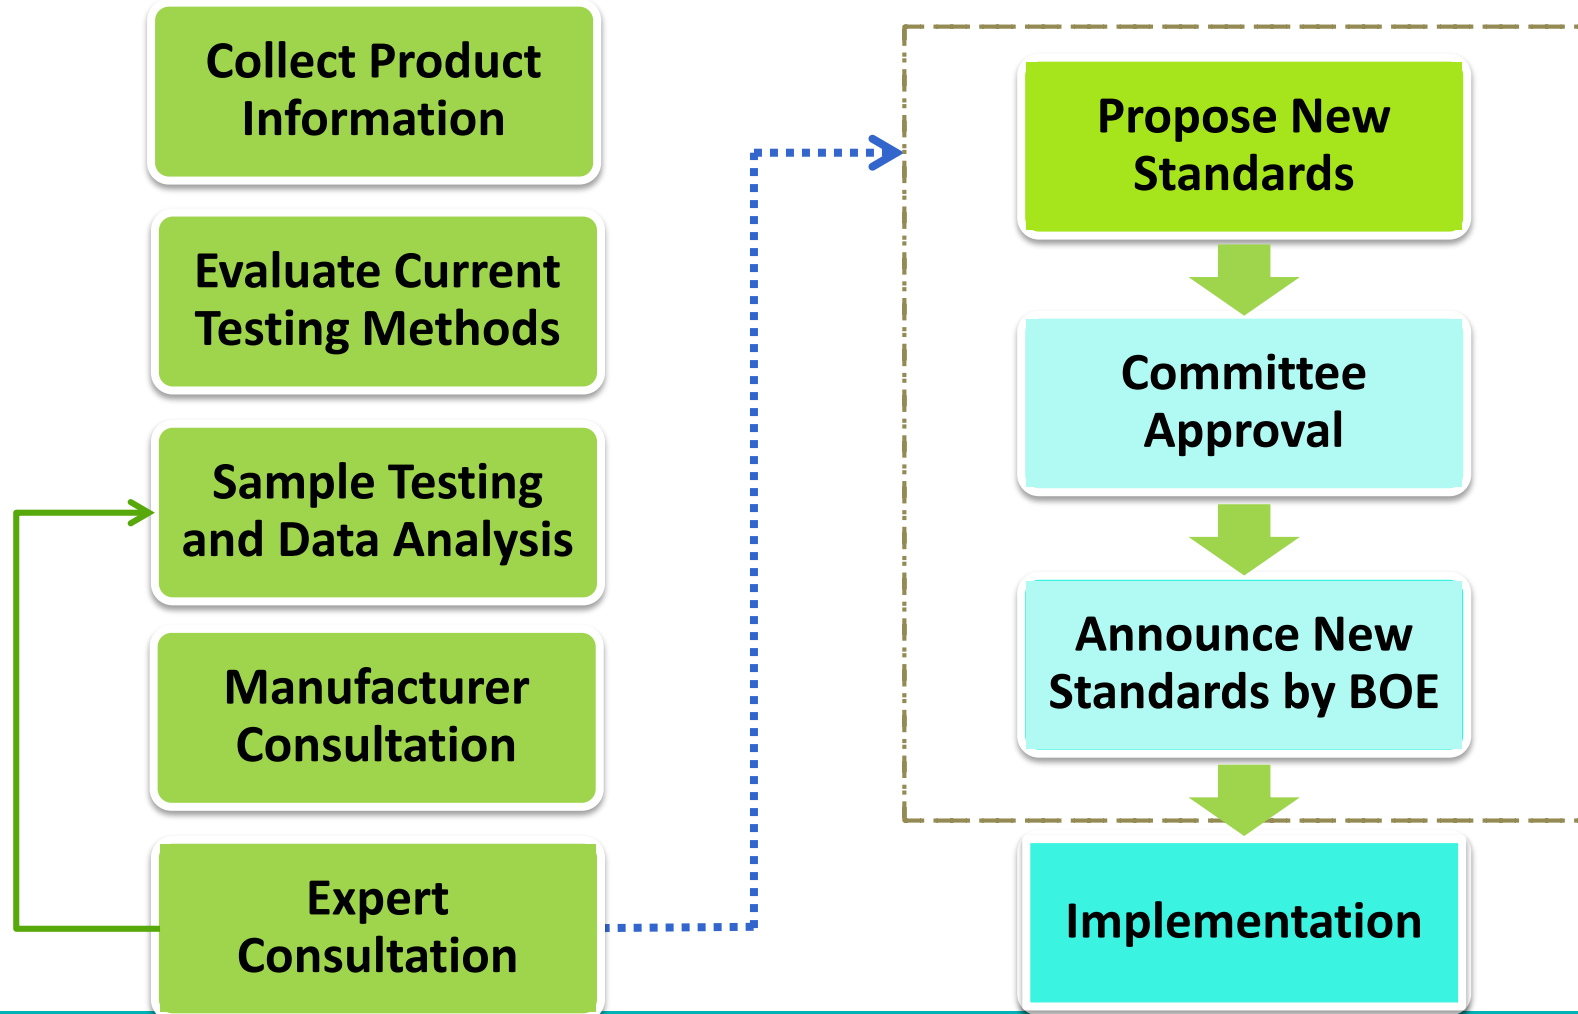

# Voluntary EE Management Program

<b>Policy</b>	Energy Conservation Labeling (ECL)		
<b>Date</b>	Implemented on December, 2001		
<b>Purpose</b>	Encourage consumers to buy high-efficiency products and to enhance market penetration of efficient products		
<b>Item</b>	<b>51 product categories</b>		
<b>Product</b>	<ol style="list-style-type: none"> <li>1. Air Conditioners</li> <li>2. Refrigerators</li> <li>3. Dehumidifiers</li> <li>4. Circulation Fans</li> <li>5. Washing Machines</li> <li>6. Clothes Dryers</li> <li>7. Fluorescence Lamps</li> <li>8. Hand Dryers</li> <li>9. Hair Dryers</li> <li>10. Warm-Hot Drinking Water Dispensers</li> <li>11. Chilled-Warm-Hot Drinking Water Dispensers</li> <li>12. Chilled-Warm-Hot Water Fountain Machines</li> <li>13. Warm-Hot Water Fountain Machines</li> <li>14. Vehicles</li> <li>15. Motorcycles</li> <li>16. Fluorescent Lamps with embedded ballasts</li> </ol>	<ol style="list-style-type: none"> <li>17. Gas burning cooking appliances</li> <li>18. Instantaneous Gas Burning Water Heaters</li> <li>19. Electric Cookers</li> <li>20. Electric Storage Tank Water Heaters</li> <li>21. Electric Hot Water Pots</li> <li>22. Exit Lights and Emergency Direction Lights</li> <li>23. Televisions</li> <li>24. Displays</li> <li>25. DVD Recorder and Player</li> <li>26. Indoor Light Fixtures</li> <li>27. Integrated Stereos</li> <li>28. Compact Fluorescent Lamps</li> <li>29. Copy machines</li> <li>30. Printers</li> <li>31. Air Cleaners</li> <li>32. Luminaires for road and street lighting</li> </ol>	<ol style="list-style-type: none"> <li>33. Ventilating Fans for Bath Room Use</li> <li>34. Ventilating Fans for Window Type</li> <li>35. Notebook Computers</li> <li>36. Desktop Computers</li> <li>37. Air Source Heat Pump Water Heater</li> <li>38. Range Hoods</li> <li>39. Microwave Ovens</li> <li>40. Axial flow Fans</li> <li>41. Centrifugal fan</li> <li>42. Ballast for Fluorescent Lamps</li> <li>43. Electric Ovens</li> <li>44. Electric Storage Tank Boiling Water Heaters</li> <li>45. LED planar Lighting Fixtures</li> <li>46. LED Lamps</li> <li>47. VFI UPS</li> <li>48. High bay Luminaire</li> <li>49. Down light Luminaire</li> <li>50. Office and Business Area Luminaire</li> <li>51. Indoor parking lot smart lighting fixtures</li> </ol>

# Revising Process of ECL

ECL will be revised every 3-5 years based on market share

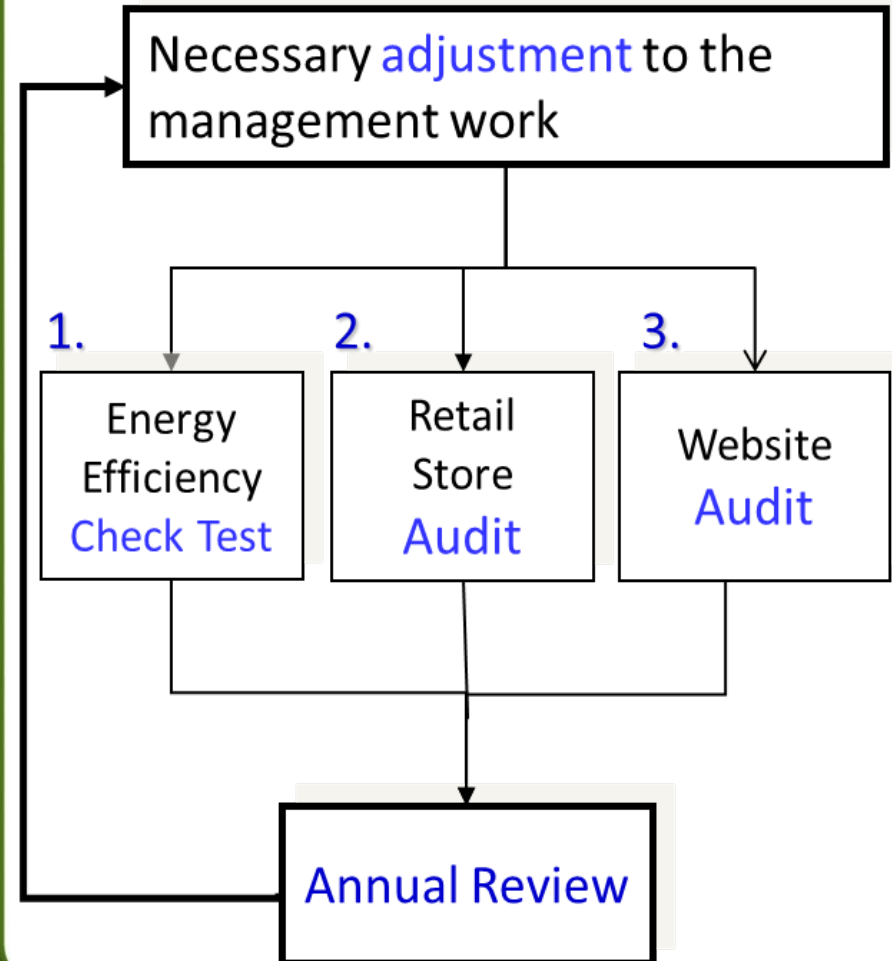

# Market Surveillance in ECL program

## Measures

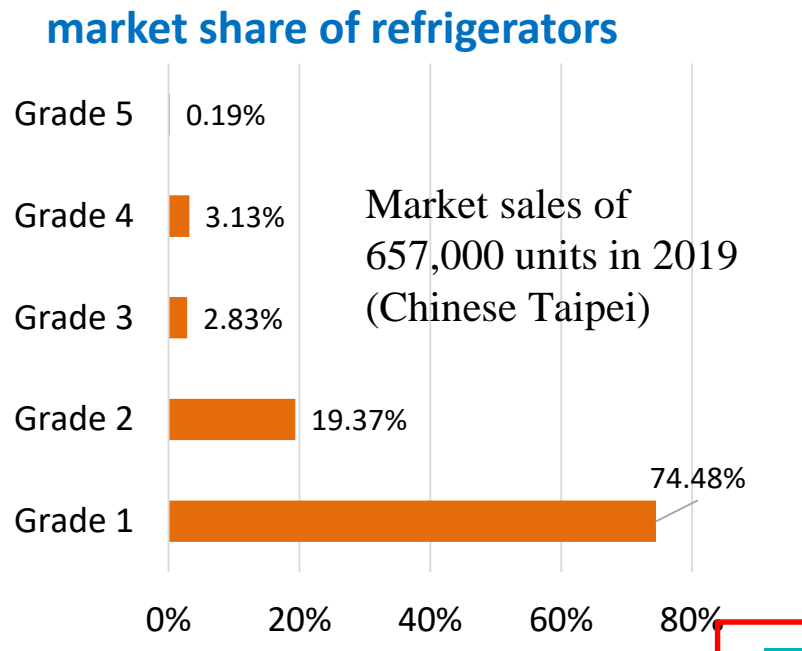

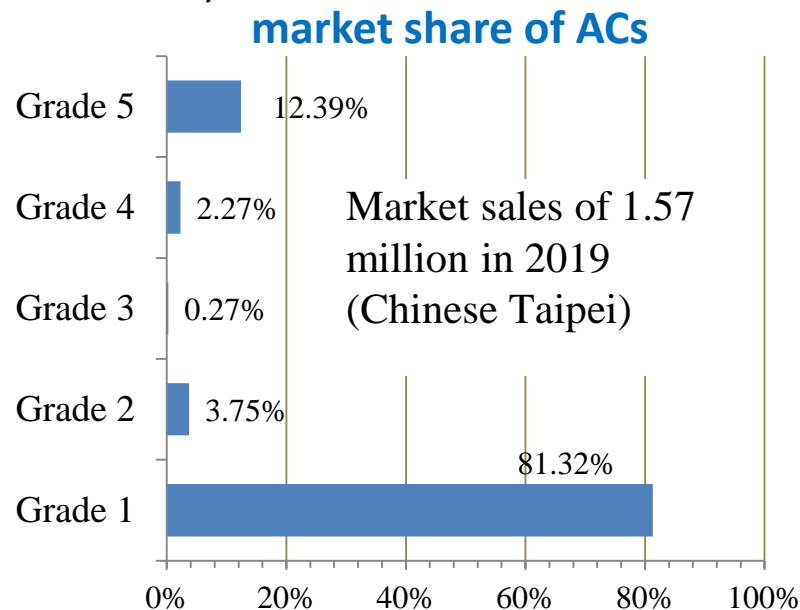

1. Check test at least 900 products every year. The manufacturers in each product item will be randomly selected for the check test.
2. Audit at least 4,200 retail stores for the correct usage of the labels.
3. Audit manufacturers and e-commerce websites for the correct usage of the labels.
4. Review the outcomes of the process and make necessary adjustment to the measures

## Process Flow

# Achievements of EE Ranking Labeling Program (Air Conditioner and Refrigerator as examples)

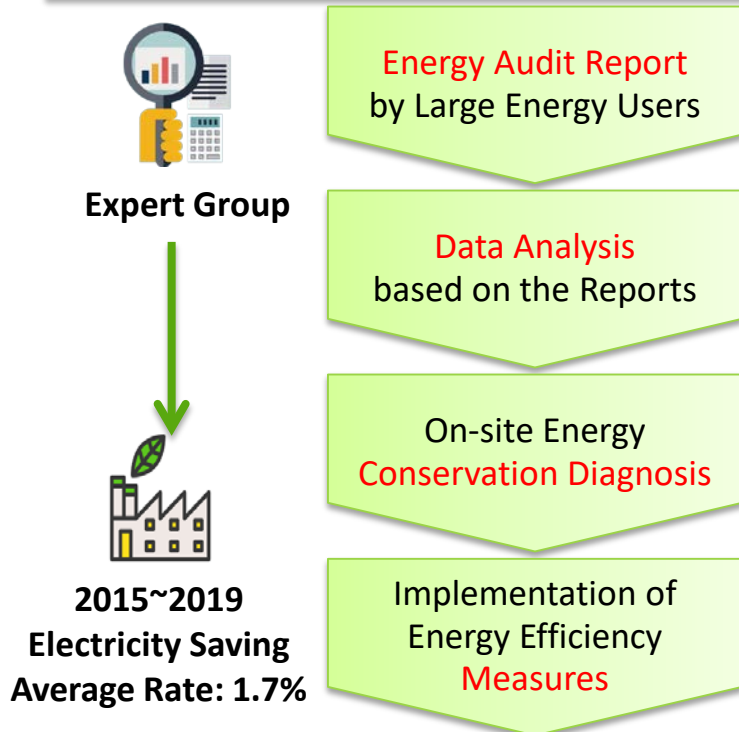

- The **rebate programs** boosted the market share of high efficiency products in 2011, 2012 and 2015.
- Air conditioners: EER changed to **CSPF** in **2016**, and **Grade 1** benchmark is **52%** higher than MEPS. The market share for Grade 1 is about 76% in 2018, and 81% in 2019.
- Refrigerator: Promoted benchmark for Grade labeling in **2018**. Grade 1 benchmark is **60%** higher than MEPS. The market share for Grade 1 is about 67% in 2018, and 74% in 2019.

# Energy Management and Audit

- Industrial and commercial sectors consumed about 81% of the total electricity consumption.
- Approximately **4,800** large energy users are regulated under the Energy Management Act.

## Process of Energy Audit Scheme

## Electricity Saving for Large Energy Users

# Public Awareness, Education & Promotion

## Holding Energy Saving Campaign during summertime

- Raise public awareness on energy saving by energy saving online campaign.
- Hold workshop events of “Energy Saving Month” from June to September, including energy auditing, subsidy, and rewards.

## Integrating society resources to develop networks of energy saving volunteer

- Promote energy saving activities with groups advocating environmental protection, museums and institutes (NGOs).
- Currently there are 4,664 volunteers and 12,056 events organized to promote energy-saving behavior.

# The Achievement of Energy Saving in 2019

24 winning corporations, governmental institutions and schools are involved, conserved 29,171 KLOE, saved 555 million NTDs and reduced 129,695 tons emission of carbon dioxide.

## Energy Saving Performance Award Winner — China Steel Corporation (CSC)

A nearly 50 Years old steel manufacturing company continued to launch the third five-year target "2020 Energy-saving Plan" (2016~2020), saving 100 thousands KLOE.

- CSC has put efforts on:
  - Cooperated with the Industrial Technology Research Institute to develop the first 200kW low-temperature heat recovery ORC power generation system in the domestic steel industry for energy using effectively.
  - Energy-saving measures are diverse and comprehensive including process improvement, production management, equipment replacement, energy management, energy recycling, lighting system replacement, etc.

# Developing Energy Efficiency and Integration Technology for Buildings

- Building systematic process and criteria through technology integration
- **Technologies:** thermal insulation paste, wireless environment sensor, iBEMS & iPOWER, and VFD Cooling Pump.
- **Advanced technology integration:** Active Magnetic Bearing Chiller, Lighting Ergonomics Control, and Bluetooth Logon/i-Sleep for computers.
- **Applications**
  - Hua-Nan Bank: Monthly saving 10% electricity for branches
  - Hsinchu Science Park Hub : EEWB-RN Diamond Certification
  - Taipower: Estimating annual saving more than 2,200 MWh for three Taipower buildings

# Conclusion

---

- After promoting the EE Management for 5 years, Chinese Taipei has reached significant achievement in energy-saving. EE benchmark of Class 1 for air conditioners and refrigerators reached higher level of energy conservation. The modified MEPS of LED Lamps is the highest standard in the world.
- **The keys to the successful EE management:**
  - ✓ Regulations of both **mandatory** and **voluntary** programs
  - ✓ Incentive promotion
  - ✓ Public awareness & education

The 54<sup>th</sup> Meeting of the APEC Expert  
Group on Energy Efficiency &  
Conservation (EGEEC 54)  
23-25 Sep. 2019, Cebu, Philippines

Thank you for your attention
